Provides full data visibility of fulfillment performance, delivery issues, customer promise attainment, returns behaviour, communication engagement and more. One central view, with instant access for unlimited users and standard exports.

Standard Features

> **Reporting & Analytics**

Full visibility of carrier SLAs, historical performance, customer promise attainment and more with Power BI data visualization.

> **Returns Analytics**

Comprehensive insights into returns initiation behavior and returns logistics with Power BI data visualization.

> **Live Monitoring**

Live data of the current day compared to previous averages, including outbound/returned orders, email performance and orders/returns with issues.

> **Standard Exports**

Easily access and manipulate your data in the tools you use daily with our data exports. Create ad hoc or regular automated exports with ease.
